WE PROVIDE

TOTAL SOLUTION

- Construction Chemicals
- Industrial Chemicals
- WaterProofing Chemicals
- Epoxy Flooring Applications

ANROC INDUSTRIAL
CHEMICALS PVT. LTD.

A GREATER MEASURE OF QUALITY & CONFIDENCE

Flooring That Lets You Shine.....

ABOUT US

Anroc Industrial Chemicals Pvt. Ltd. is a leading chemical Manufacturer & Distributors of industrial and fine ingredients in Mumbai. Founded in 2012, our supplier partnerships, customer relationships, extensive market knowledge, and unmatched expertise in supply chain optimization are the foundation of our company.

Anroc Industrial Chemicals Pvt. Ltd. with vast experience and knowledge, involved in manufacturing and supplying an extensive grade of **Epoxy resin and hardener** to our clients.

The offered hardener is widely used for Industrial/Commercial/Residential/3D Epoxy flooring/ Lamination with fiber glass, carbon fiber and waterproofing. Our provided materials is precisely processed using premium quality chemicals in line with set industry standard. In addition to this, we provide this hardener to our clients in different packaging options at pocket friendly prices.

COMPANY POLICY

We are visionary yet realistic, we envision reduction of environmental damages by making the world a better and safe place to live, by creating clean, safe and healthy working environment by complying with all the technical and statutory requirements and leading by example we choose to compete and be recognized as the trusted and a long-term partner to our customers.

OUR VISION

The company has always believed in QUALITY FIRST & hence sourcing of the products is based on "Prevention Is Better Then Cure" theory, which enables to forecast all unseen problems & maintain the High Quality Standards along with cost effectiveness. We believe in PROGRESSING with our VALUED CLIENTS & enrich our business with ETHICS.

WHY CHOOSE US

- ✓Shared Value
- ✓Commitment to Safety and Quality
- ✓Extensive product offering, Cost-to-Cost Distribution
- ✓Dedicated Customer service, In-House logistics
- ✓Unmatched Industry Expertise
- ✓Distinctive Results, Sustainable advantages

COMPANY STRUCTURE

Anroc Industrial Chemicals Pvt. Ltd. have a team of highly qualified and seasoned professionals with in-depth knowledge of the field. The professionals don't leave any stones unturned for the complete satisfaction of compositions, purity, shelf life, physical and chemicals properties etc. Expert's professionals at Anroc Industrial Chemicals Pvt. Ltd. have deeper understanding of chemicals and chemistry and its applications to formulate specialty coating and advises with high performance properties. Since its inceptions Anroc Industrial Chemicals Pvt. Ltd. have grown to scaling heights and at this infant's stage. This is the result of us allways abiding by the high standard of honestly consistency and efficiency of work and always striving to set the high standards.

OUR PRODUCTS

The products are accessible in various specification as per the requirement of the customers. They are resistant to high temperature as well as tough weather conditions. Owning the industrial expertise and manufacturing facilities, we have been able to cater an assorted range fi construction and industrial chemicals.

PRODUCT

RAW MATERIAL PRODUCTS

- Epoxy Resin
- Phenalkamine Epoxy Hardener
- Polyamide Epoxy Hardener
- Cycloaliphatic Epoxy Hardener
- PU Resin & Hardener
- Solvents
- Epoxy Diluents in RD & NRD
- Coal Tar Epoxy
- Construction Chemicals

FINISHED PRODUCTS

- Anroc HI-Bond Epoxy Tile Grout
- Anroc EP Bond "Concrete Bonding Agent
- Anroc Epoxy Mortar
- Anroc Waterproofing Chemicals
- Anroc Epoxy Primer AN EP 115
- Anroc Epoxy Top Coat AN EP 221
- Anroc Epoxy Paints
- Anroc SL Coating EP 555
- Admixtures & Plasticizers

APPLICATIONS

EPOXY FLOORING

WATERPROOFING

3D EPOXY FLOORING

PU FLOORING

EPOXY FLOORING

Epoxy floor coating makes renders concrete exceptionally durable. They also offer **benefits** of anti-fatigue and can be easily rolled-out on the cement without mortar or glue. **Epoxy flooring** protects the underlying concrete from moisture, stains, grease, and cracks.Floors are usually something to which we don't pay much attention unless something is wrong with them & yet they are an essential part of workday productivity & safety. You may want to consider an alternative flooring option for your facility & its potential impact. One of these options is epoxy floor coating

Epoxy is a material that acts as a sealant for concrete floors. Epoxy coatings can be used on floors for commercial buildings, walkways, even on walls or ceilings at times, and most commonly on garage floors now days most popular for residential floorings and 3D epoxy floorings in various designs. Many facilities that have already experienced the benefits of epoxy flooring are commercial or industrial buildings such as manufacturing plants, warehouses, pharmaceutical buildings, and food or beverage plants, even laboratories.

STRENGTH OF EPOXY FLOORING

Here are the major benefits of installing epoxy coating in your building-

DURABILITY:	Concrete floors coated in epoxy last longer and resist considerable wear, thus saving you money and allowing you to manage other business concerns.
STRENGTH:	Once the epoxy has been converted to a solid polymer, it becomes incredibly strong and prevents chemical breakdown.
SAVES TIME:	Epoxy flooring is usually quickly and easily installed, which means less time shutting down production for installation.
LOW MAINTENANCE CLEANING:	Once concrete has the epoxy coating, it is no longer porous since sealed and is therefore easier to clean.
AESTHETIC:	Coatings are usually available in an array of colors and patterns to fit your specific style.
CHEMICALLY RESISTANT:	Epoxy coatings can survive continued exposure to potent chemicals, which is perfect for warehouses or plants that may be exposed to such materials.
SAFETY:	These coatings are also resistant to slippage, temperature, extreme impact and even fire, maintaining both the safety of your employees and your building.
BRIGHTNESS:	Typically, a high gloss option for coatings can be provided, which improves lighting in your facility to a significant degree due to reflection.
LOWERS VEHICLE MAINTENANCE:	Choosing an epoxy coating can also reduce wear on vehicles in your facility because it is more forgiving on machinery.
HELPS THE ENVIRONMENT:	Lastly, epoxy coatings are a green option for your business because of the reduction in material usage. It is a great alternative to adding on a completely new floor or replacing vehicles due to damage.

Epoxy floor coatings are commonly used for commercial and industrial flooring. Epoxy coatings are normally applied over concrete floors to provide a high-performance, smooth, and durable surface that can last many years and with stand heavy loads. Many industrial sites, warehouses, and commercial buildings rely on epoxy floors to maintain clean and safe conditions for workers, equipment, and inventory.

SPECIALIST IN 3D EPOXY FLOORING

EPOXY FLOOR COATING ADVANTAGES

Epoxy floor coatings offer many advantages when compared to other traditional coatings applied over concrete-

- Creates a shiny high-gloss surface that can significantly increase the brightness of interior areas
- Offers a hard-wearing durable surface able to withstand heavy and continuous traffic
- Quick and easy to install, requiring no layout, cutting additional adhesives, or special tools or equipment
- Durable and easy to clean
- Ideal for warehouses and industrial applications
- Resists oil stains and water
- Creates a seamless surface that can last many years
- Can be combined with paints and colors to mask off chips and cracks
- Provides a chemically resistant surface ideal for manufacturing plants
- Offers enhanced safety when the surface contains anti-slip additives
- Can be applied in different patterns to create visible driveways and/or identify walkable areas
- Prevents wear and tear on existing concrete floors
- May be compatible with self-leveling products that can be applied over new or old concrete, depending on the product
- Requires little or no major maintenance

HI-BOND
EPOXY TILES GROUT

DESCRIPTION

Provides A Stain Free, Chemical Resistant, Hard Wearing, Tile Join for Areas Such As Bathrooms, Fountains And Swimming Pools, Factories, Workshops And Warehouses, Pharma Industries, Hospitals And Labs.

ADVANTAGES

1. Excellent Resistance to industrial chemicals
2. Solvent free can be used in confined areas
3. Attractive appearance, easily cleaned
4. Available in range of attractive colours
5. Low odor formulation

RECOMMENDED

1. Kitchens
2. Bathrooms
3. swimming Pools
4. Hospitals
5. Hotels
6. Resturants
7. High traffic Area

Epoxy Resins Based Chemical Resistant Tile Grout

Packaging:- 1 Kg, 5 kg

ANROC EP-BOND
EPOXY CONCRETE BONDING AGENT

DESCRIPTION

Anroc EP-Bond Is Based On Solvent Free Epoxy Resins Containing Pigments And Fine Fillers. It Is Supplied As A Two Part Material In Pre Weighed Quantities For Ready Onsite Mixing And Use

Colored Components - White Base And Green
Hardener - Provide Visual Evidence That Adequate Mixing Is Achieved

ADVANTAGES

1. Can Be Used By Brush
2. more Overlay Time
3. High Bond Strength
4. Barrier Coat

Epoxy Resin Concrete Bonding Agent

Packaging:- 500gm, 1 Kg, 5 kg

WATERPROOFING CHEMICALS

WHAT IS WATERPROOFING?

It is very well said that maintaining a building and keeping if it is more difficult task than buying it or getting it constructed. This is because there are many internal as well as external factors that can pose problems for the owner of that building. For instance, water leakage in a building is a very serious matter of concern for most of the owners. This problem not only decreases the life of the building, but also damages are foundation. This is a very common problem especially in India. We all would agree that owning a home is the considered one of the largest investments a person plans to do during his or her life time. There for, people take different steps to safe guard the value of this investment and seeking for better base of improving its value as well as life.

Waterproofing the house of us an effective way with which, they can protect these valuable assets from water damage and associated problems. For this, most people prefer to opt for one of the best waterproofing companies & contractors in India as they can help them with high level of efficiency.

WHY IS WATERPROOFING NEEDED?

If there is water seeping from a walls and other parts of building, it can lead to metal corrosion, electric dangers, decaying of timber structures, swelling of plaster boards, growth of fungus leading to health hazards. As a great solution for the prevention of all such problems, a strong and well planned waterproofing frame work guarantees increasing the time span of the usability of the concrete, which a main material responsible or the strength of any buildings, thus giving longer sturdiness of a structure and bringing down the maintenance costs. However, it is very important to select a credible contractor after a thorough research and detailed study.

WATERPROOFING APPLICATIONS

WET ROOMS

Permanent Waterproofing System For Dry-wall Wet Areas
And Use Under Tiles In Bathrooms, Kitchens And Balconies.

STRUCTURAL

Waterproof coatings designed to cover positive and negative pressure requirements. For Foundations, basementsand more.

ROOFING & SLAB

Tough,durable and weather resistant waterproofers for roofs made of concrete, aluminium sheets, metal sheets and cement fibre.

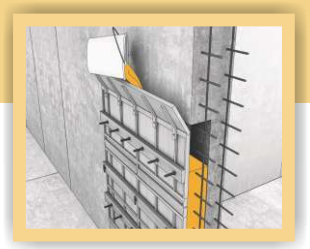
WATER RETAINING

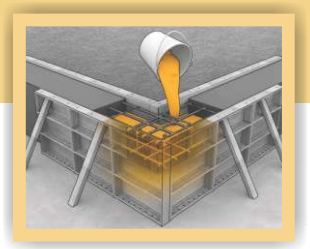
Positive Pressure Water Proofing Products
For Swimming Pools, And Potable Water Tanks.

P U CEMENTITIOUS FLOORING

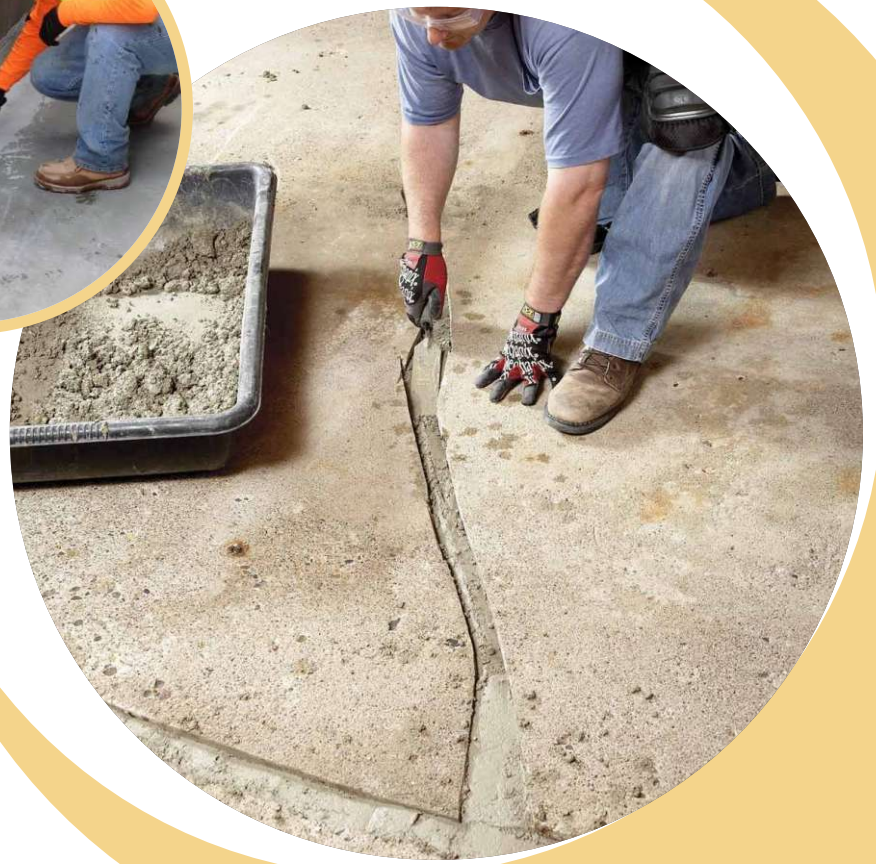
Tough, Long lasting, UV resistant,weather resistant
& Anti Bacterial coatings on cementitious flooring.

We will be here tomorrow to stand behind what we do today!





CONSTRUCTION CHEMICALS



Construction chemicals are used by the Construction and civil repair industry. These chemicals help to enhance concrete strength and quality, provide water-tightness and protect concrete structures from atmospheric degradation.

Our range of admixtures, sealants, waterproofing solutions, repair mortars and systems, tile fixing adhesives, tile joint fillers, floor hardeners, and cement / epoxy based grouts are used by Construction Companies, ready-mix concrete manufacturers, civil contractors and repair and waterproofing applicators. These products find applications in infrastructure projects, industrial construction, residential and commercial construction.

The Products are sold directly to large customers and through a channel of dealers and distributors across many parts of the States. We cater our chemicals to distributors and dealers by following a unique number series so that they are easy to understand and recall in small pack sizes, while the infrastructure projects are catered by the "ANC" series of products in bulk pack sizes.

We have a cutting edge R & D centers manned by an excellent pool of professionals and state-of-the-art manufacturing facilities at 4 different locations.

OUR WIDE RANGE OF CONSTRUCTION CHEMICALS

PRODUCTS

- Sealant
- Tiling
- Cementitious flooring
- Concrete Admixtures
- Cementitious waterproofing
- Cementitious Grouting
- Surface treatment
- Repair cracks
